Library Management System

Kalimbetova Aray

Description

The Project is Library Management System. "MyBooks"

- In the system Librarian will manage all books, authors, and publishers in the library. Librarian can view all books, authors, publishers or categories and add/edit/delete them.
- In the system we have ADMIN which will manage users in the system.
- User will be able to see all books and authors in the system, filter books by category. User can borrow the books and manage its own borrowed books, return them if necessary.
